

Monosubstituted cyclopentadienyl half-sandwich transition metal complexes

Neil J. Coville¹, Karen E. du Plooy and Wolfgang Pickl²

Applied Chemistry and Chemical Technology Centre, Department of Chemistry, University of the Witwatersrand, PO WITS, 2050 Johannesburg (Republic of South Africa)

(Received 11 January 1991)

CONTENTS

A. Scope of the review	4
B. Historical introduction	6
C. Synthetic strategies for the synthesis of monosubstituted cyclopentadienyl complexes	8
(i) General synthetic strategies for the synthesis of monosubstituted cyclopentadienyl ligands	9
(a) Strategies utilising fulvenes	9
(b) Cyclopentadienide salts ("Wurtz synthesis")	13
(c) Creation of cyclopentadienes from organic fragments	14
(d) Release of the substituted cyclopentadiene from a metal: synthesis of substituted cyclopentadienes	14
(e) Substituted cyclopentadienes by nucleophilic ring-opening of spiro[2.4]hepta-4,6-diene with organolithium compounds	17
(f) Creation of substituted cyclopentadienyl ligands from organic fragments bonded to a metal	19
(ii) Preparation of monosubstituted cyclopentadienyl ligands according to ligand type	21
(a) Boron-substituted cyclopentadienylmetal complexes	21
(b) Alkyl-substituted cyclopentadienylmetal complexes	23
(c) Vinyl substituents	28
(d) Syntheses of acyl- and related cyclopentadienylmetal complexes	29
(e) Syntheses of phenylcyclopentadiene and other arylcyclopentadienes	34
(f) Cyano-substituted cyclopentadienylmetal complexes	36
(g) Syntheses of silyl-, germyl-, and stannyl-cyclopentadienyl complexes	36
(h) Syntheses of nitro-cyclopentadienyl complexes	41
(i) Syntheses of amino-substituted cyclopentadienyl complexes	42
(j) Phosphorus-substituted cyclopentadienylmetal complexes	44
(k) Oxygen- and sulphur-substituted cyclopentadienylmetal complexes	46
(l) Syntheses of halogen-substituted cyclopentadienyl complexes	46
(m) Transition metal-substituted cyclopentadienyl complexes	47
(n) Deuterium-substituted cyclopentadienyl complexes	49
D. Survey of half-sandwich cyclopentadienyl transition metal complexes	50
(i) Titanium, zirconium and hafnium	50
(a) (η^5 -C ₅ H ₄ R)M(I) complexes	51
